WE MAKE THOUSANDS OF PRODUCTS THAT AREN'T SIMPLY IMPORTANT. THEY'RE **VITAL.**

At Tyco International we make more than 200,000 products for hundreds of different industries. We supply high-performance relays, power distribution modules, connectors, and other electrical products to almost every commercial aircraft in production today. From critical aerospace applications to police radios to food packaging, the things we make aren't just important. They are a vital part of your world.

WILMER CUTLER PICKERING
HALE AND DORR LLP

Wilmer Cutler Pickering Hale and Dorr LLP is a Delaware limited liability partnership. Our UK offices are operated under a separate Delaware limited liability partnership.

Technology Review Contents

Volume 108, Number 1

6 **Company Index**
Organizations and people mentioned in this issue.

10 **From the Editor**
Notes on the redesign of *Technology Review*. What have we done?

12 **Letters**
Our November story on technology's failure in Iraq inspired a lot of mail.

README
Read before operating this magazine

15 **Google: Be a Little Evil**
Google is on a collision course with Microsoft. It's time to get serious.

16 **Don't Buy That New Gadget**
Or do. Just don't think that it will make you happier.

16 **To Mars, by Tortoise**
NASA's new plans are exciting. Let's hope they are also sensible.

17 **Real Benefits, Real Risks**
Companies that make nanomaterials should work hard to earn our trust.

FORWARD
Short items of interest

18 **The U.K. Banks on Stem Cells**
Will the U.S. be forced to cash out?

20 **Air Cargo Insecurity**
Some illuminating numbers alarm us.

21 **Knowledge Free-for-All**
Wikipedia's founder likes the mess.

22 **Wireless on Wheels**
The latest advances in telematics.

25 **Change of Plans, Ponce de León**
This startup's prize is health, not youth.

26 **Tuning in to Technology's Past**
We've got a lot to learn.

And more...

BRIEFCASE
The business of emerging technology

28 **Amazon: Giving Away the Store**
Sometimes it makes sense to give away your core assets.
Wade Roush

32 **Military Vaccine Studies: On Trial in Thailand**
Critics say the U.S. is wasting millions on a doomed AIDS-vaccine trial.
Jon Cohen

34 **Mitsubishi: Out Front in Nanotech**
Advance diplomacy may be the best policy for nanoparticle manufacturers.
Stephan Herrera

MEGAPHONE
Something worth shouting about

36 **A New Idea for Publishing**
Smart Web ads could restore the balance between publishers, their audience, and advertisers.
John Battelle

FEATURES

38 **What's Next for Google?**
Running the Web's best search engine isn't enough: Google wants to organize *all* digital information. That means war with Microsoft.
Charles H. Ferguson

48 **The Problematical Dr. Huang Hongyun**
Can an experimental technique using transplanted fetal cells help paralyzed patients? Probably not. But a doctor in China is forging ahead anyway.
Horace Freeland Judson

54 **What We Can Learn from Robots**
For Japan's Mitsuo Kawato, robotics is important because it explains how the human brain works, not because it could yield artificial humanoids.
Gregory T. Huang

60 **The Future of Books**
Jason Epstein was a publisher for more than 40 years. Now in retirement, he wants to replace Gutenberg with a digital press.
Jason Epstein

38

COVER STORY

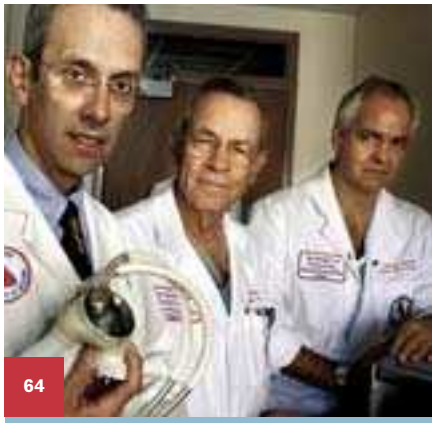
This could get ugly

Will Google 2004 be Netscape 1995 all over again? Everyone loves the search firm's technology. But there's reason to doubt that it's ready to compete with Microsoft. We asked Charles Ferguson, a legendary entrepreneur who, in 1995, sold Vermeer Technologies to Microsoft for $130 million, to explain the opportunity and danger that Google now faces.

Contents, continued

71

MEGASCOPE
Fashion matters in the gadget world
The dandy is alive and well. That's good news for the makers of electronic devices.



64

DEMO
Just the ticker
SynCardia Systems of Tucson, AZ, has built a bridge for patients awaiting transplants.

78

REVIEW
Are we on our way to Mars?
It's been a long time since manned spaceflight captured our imagination.

DEMO

64 **Cure for a Broken Heart**
Cardiac patients waiting for transplants now have a temporary fix. We got access to an eye-popping surgery.
Corie Lok

MEGASCOPE
A look at the big picture of technology

71 **Digital Dandies**
To understand the market for gadgets, you need to understand fashion.
Ed Tenner

REVIEWS

72 **Technology and Happiness**
Why getting more gadgets won't necessarily increase our well-being.
James Surowiecki

78 **Toward a New Vision of Manned Spaceflight**
President Bush wants to give NASA a second life. Good.
Mark Williams

81 **The Zen of Airport Kiosks**
Technology's gift of mindlessness and painlessness.
Michael Schrage

SYNOPSES
New publications, experiments, and breakthroughs—and what they mean

82 **Information Technology**

83 **Biotechnology**

84 **Nanotechnology**

DATA MINE

86 **The Vitality of Biotech**
Its future is exciting, but how crucial is biotech to *today's* pharmaceutical industry? **Stacy Lawrence**

OBITUARY

88 **The Third Man**
Maurice Wilkins's early fascination with DNA was essential to the discovery of the double helix.
Andrew P. Madden

This month on technologyreview.com

Our website—the daily destination for smart news about emerging technology—has a new look.

- » Read stories and analysis in the Notebook
- » Check out our slant on the day's news in the Take
- » Get information straight from the nation's leading labs in the Blogs
- » See the day's top technology headlines with RSS Feeds
- » Find magazine updates, charts, photographs, and new information with keyword navigation

About Technology Review *Technology Review*, the oldest technology magazine in the world, is published by Technology Review, Inc., an independent media company owned by the Massachusetts Institute of Technology. Since 1899, *Technology Review* has described emerging technologies and analyzed their commercial, economic, social, and political impact for an audience of senior executives, researchers, financiers, and policymakers, as well as for the MIT alumni. In addition, Technology Review, Inc. produces technologyreview.com, a website that broadcasts daily news and opinion on emerging technologies. It also produces live events such as the Emerging Technologies Conference.

IEEE is PATENTS.

The most valuable assets in Lee's company are patents based on IEEE-published research.

IEEE science is the foundation for today's inventions and tomorrow's technology innovations. Patents cite IEEE research three times more than any other publisher – and referencing to IEEE papers has increased 267% in the last decade.

Patents mean more successful products and higher sales. Studies show that patents and investment in R&D are key factors in a company's profitability. Access to IEEE publications can help your company develop new patents, compete in the global marketplace and become a leader in your field.

To Lee, IEEE is patents. Discover what IEEE can be for you.

Go here.
